**Sika® Flooring Announces Winners of Projects of the Year**  
*Wells Restoration Presented with Industrial Flooring Award*

Lyndhurst, NJ – February 26, 2019 – Sika Corporation's Flooring business unit has recently selected the winners of its annual Project of the Year for projects completed in 2018. Each year members of the Sikafloor® Partners Club submit projects to be rated on craftsmanship, design/aesthetics, incorporating special requests, overcoming challenges and overall customer satisfaction. The projects are reviewed by a panel of industry experts and winners are selected in three main categories, along with one project receiving the Judge's Choice Award.

The 2018 Sikafloor Projects of the Year Industrial Flooring Award has been presented to Wells Restoration of Rowley, MA, a Master Level Sikafloor Installer, for their project at Wave Life Sciences in Lexington, MA.

This project involved installing several of Sika's chemically resistant flooring systems throughout the facility to meet specific environmental requirements of each area. Wells provided consultative services to the owner and general contractor to address several challenges in the project's scope. The facility's managers praised Wells for their craftsmanship and knowledge in selecting materials appropriate to their unique environment.

"We are pleased to welcome Wells Restoration to the elite level of the industry," said Stew Snoddy, senior vice president of Sika Corporation's Flooring Division. "They have shown themselves to be the best of the best in the business, having demonstrated an unparalleled commitment to quality, innovation and customer satisfaction."

For detailed descriptions, additional information and photographs of these project please visit [www.SikaFloorUSA.com](http://www.SikaFloorUSA.com).

Sika Corporation is a global leader with over 100 years of experience in building materials and restoration technologies. Sika's high performance, seamless floor and wall systems are trusted and relied upon by designers and facility managers for their outstanding performance, durability, easy maintenance and aesthetic enhancement in a wide range of industries that include food and beverage, electronics and static control, clean rooms, pharmaceuticals, education, transportation, commercial / institutional construction, and general manufacturing.
